

Customer Story

HerSpace Medical Spa

HerSpace Medical Spa is an aesthetic medicine clinic offering some of the best youth retaining services to people. Located in Little Silver, NJ, the spa has wellness treatment, skin care treatment and anti ageing services for both men and women. Kybella, IV hydration, PDO threads, Microneedling and Botox are some of the services provided.

All procedures and products used for treatment are aligned with the latest medical technology. Qualified professionals with adequate experience work together with patients to offer them a personalized wellness experience. The aim of every treatment is to seek the patient's requirements and offer them suitable treatments.

Challenge

In 2021, HerSpace Medical Spa contacted Growth99 with the need of a strong digital presence. Previously they had no website, any online reviews and neither did they feature on Google My Business. Growth99 had a challenge of creating a digital footprint for HerSpace Medical Spa from scratch.

HerSpace Medical Spa wanted to grow their online presence with the help of a new website and strong SEO.

Solution

Growth99 started out by creating a robust and well functioning website for HerSpace Medical Spa. The website was impressive and offered a lot of information about the facilities and services available at the spa. Thanks to a failsafe digital marketing strategy, the website began ranking higher up during Google searches.

The number of online bookings have increased rapidly since the new website has been functional. HerSpace Medical Spa now caters to people across a larger area than before due to their increasing popularity.
