

Customer Story

Injector Belle Aesthetic Medical Spa

Injector Belle is an aesthetic spa specializing in injectable treatment options for anti-aging and tissue rejuvenation. Botox and dermal fillers are among the treatments that the spa offers. Danielle Neslund, an aesthetic nurse with ten years of experience, offers her clients a personalized treatment experience at Injector Belle. Danielle believes that injection therapy is not only a medical technique, but an art that is aimed at rejuvenating the patients. Danielle uses only the best quality skin care products and the most advanced equipment during treatments.

Challenge

Injector Belle did not have a website or any digital footprint before contacting Growth99. Danielle Neslund chose Growth99 as the digital marketing partner for her spa because she wanted to work with someone who was reliable and experienced. Danielle wanted to give a makeover to her spa and market it as a successful brand in the world of medical aesthetics.

Solution

Growth99 designed a robust infrastructure and support system for the new Injector Belle website. A successful online reputation management strategy by Growth99 enabled Injector Belle to rank higher in local listings. An SEO strategy was embedded in the website to help increase the online popularity of Injector Belle, as well.
