

Customer Story

ReAwaken Med Spa

ReAwaken Med Spa is a wellness spa that aims at helping their clients to look and feel good about themselves. True to its name, the spa helps clients 'reawaken' their inner beauty through several anti-aging and skin care services. The B12 injection therapy that the spa offers is aimed at rejuvenating and refreshing oneself.

ReAwaken Med Spa also has a range of premium quality skincare products that they use for all treatments. Holly Shemami, a board certified family nurse practitioner, is the founder of ReAwaken Med Spa. She performs treatments like dermal fillers and microneedling at the spa.

Challenge

ReAwaken Med Spa looked to Growth99 for help in the Fall of 2021. The spa didn't have a digital footprint due to lacking a website or any social media presence. The spa wanted Growth99 to help scale its business and create an impressive image for itself in the field of medical aesthetics.

Solution

Growth99 designed a website for ReAwaken Med Spa that was supported by a robust infrastructure. A new Google My Business page that Growth99 designed helped the spa to get more leads. Due to the efforts taken by Growth99, the spa has greater online visibility and more website traffic.
