

Customer Story

Revive Med Spa

Revive Med Spa is a cosmetic aesthetics and beauty clinic where clients go for rejuvenating skin and spa treatments. Fillers, Botox, body contouring, laser treatments, and facial therapies are available for men and women of various age groups at Revive Med Spa. A team of experienced and talented nurse practitioners, physician assistants, and registered nurses offer a personalized experience to each client throughout the duration of their treatment.

Challenge

Revive Med Spa was lacking the adequate expertise and guidance to scale its business successfully when it came in contact with Growth99 in the Summer of 2021. The spa was unable to garner adequate online leads and wanted help from Growth99. Revive Med Spa hoped to gain more web popularity on Google and other search engines. The spa wanted to increase its website traffic with the help of Facebook ads.

Solution

Growth99 released a new website for Revive Med Spa that was embedded with a carefully devised SEO strategy. The lead generation rate for the website has increased tremendously without increasing the cost-per-lead. The click through rate for the website has greatly improved due to which the spa is getting more online bookings.
