GROWTH99

Customer Story

Dynamic Health Solutions

Dynamic Health Solutions is a wellness spa offering holistic treatment for weight loss, hormonal imbalance, general fatigue, sexual disturbances, and injuries, to name a few. The spa offers its clients a complete wellness package to rejuvenate their physical and mental health. Certified and licensed lifestyle and weight management coaches and doctors are part of the team of experts at Dynamic Health Solutions.

Challenge

Dynamic Health Solutions connected with Growth99 in December 2021, seeking help with increasing its online presence. The spa had an existing website, though it was not built to scale the business satisfactorily.

The old website was based on an unreliable infrastructure and was not able to garner adequate leads. The website did not have strong SEO backing due to which it had poor online visibility.

Solution

Growth99 developed a robust infrastructure to help Dynamic Health Solutions function smoothly. A successful CRM strategy complete with an automated reply system helped the Dynamic Health Solutions website grab a lot of online attention.

The lead generation and conversion rate began to soar due to the number of online visitors making a beeline for the spa website.
